Dear "ohn

1/13/95

As those I respect as the nuts and your brief there should be a new investigation, they are too ingenuine to know that they have no leads and could not follow them if they did. They regard all of this as they would a novel in reading but that believe their craziness is real. They and all like them have been hurtful in undermining all credibility and misleading the people who care and who trust and believe them.

Any investigation of the assassination inevitably means an investigation of the CIA and no politician can hope to survive that.

So you cant with the Commission and with NSCA.

The best we can hope to do now is keep the people accurately and honestly informed and to give them to understand that their government phonied it all up and did not investigate the crime itself.

But all the contradictory stories not one of which is factual keeps them confused, as all such stories in the past did.

Thanks for the try with "aryann.

Best,

Harold
